

Sagard Overview

Sagard Holdings ("Sagard") is a multi-strategy alternative asset manager with professionals located in North America, Europe, and the Middle East. Since 2016, Sagard has grown exponentially. Assets under management have expanded from US\$500M to over US\$28B, and Sagard's team of diverse professionals has grown from 50 to over 400 team members.

Sagard invests across four asset classes: Venture Capital, Private Equity, Private Credit, and Real Estate. Sagard Holdings was founded by Power Corporation of Canada as a complement to its global investment holdings and serves as one of its key strategic priorities with strong, long-term growth objectives.

Sagard develops long-term partnerships and empowers the growth of its investments through a unique global network of portfolio companies, limited partners, advisors, and other valued relationships.

AI Team & Mission

Sagard is on a journey to become an AI-first organization. An essential part of this journey includes collaborating with Sagard's portfolio companies to accelerate their AI and Product ambitions, by implementing scalable AI solutions.

We're looking for an **AI Engineering Intern** to join our team and work directly with Sagard's portfolio companies on high-impact AI projects. You'll help ideate, build and deploy new AI-driven product features, accelerate prototyping through hackathons and bootcamps, and solve complex technical challenges. You'll collaborate with product leaders, ML researchers, and engineering teams to bring advanced AI capabilities into production and deliver measurable business value.

What You'll Do

- **Rapid Prototyping:** Translate business problems of portfolio companies into scalable AI prototypes using state-of-the-art techniques, including LLMs, retrieval systems, and multimodal models.
- **Deployment & Productionization:** Design and build performant, cost-efficient, and maintainable AI systems that can be deployed into production environments.
- **Trend Analysis & Experimentation:** Stay at the forefront of AI and ML trends, attend AI conferences, assess emerging technologies, and prototype novel approaches.
- **Collaboration with Portcos:** Partner with portfolio companies to identify and implement AI opportunities that enhance their operations, product capabilities.

What You Bring

- Master's / PhD in Computer Science, Artificial Intelligence, Machine Learning, or a related field.
- 2+ years of experience (prior internships count) in developing and deploying AI/ML systems (experience in LLM-based architectures is strongly preferred).
- Understanding of ML fundamentals and SOTA models as they relate to NLP, Computer Vision and Multimodal Reasoning tasks.
- Proficiency in Python and frameworks like PyTorch, LangChain, Agno, CrewAI or similar.
- Strong problem-solving mindset with the ability to translate business needs into technical solutions.
- Excellent collaboration and communication skills, particularly in cross-functional environments (Bonus points if you enjoy the craft of presenting technical concepts in simple words).

Why Join Us

You'll be part of a small, entrepreneurial AI team shaping how Sagard partners with its portfolio companies. You'll get to lead high-impact projects, experiment with cutting-edge tools, and help portfolio companies discover the potential of AI in their day-to-day work.

You'll gain exposure to the world of venture capital and private equity, connect and build rapport with C-level executives of portfolio companies, and also learn how startup investing works.

We're looking for a builder, enabler, and evangelist who wants to make AI real across several portfolio companies.

Let's make this happen – together!

Sagard is an equal opportunity employer, which values diversity in the workplace. We are therefore happy to accommodate any individual. If you require accommodation in order to participate in the hiring process. Please contact the People & Culture team to make your needs known in advance.

We welcome all applications and wish to thank all candidates for their interest in applying for this position. However, only individuals selected for interviews will be contacted.
